

# Work Package 3 Cross-border Virtual Utility

09.10.2013, Innovation Event, Horsens

# FUTURE INTERNET SMART UTILITY SERVICES

# **B2B Energy Eco-System of WP3**

#### **Objectives**

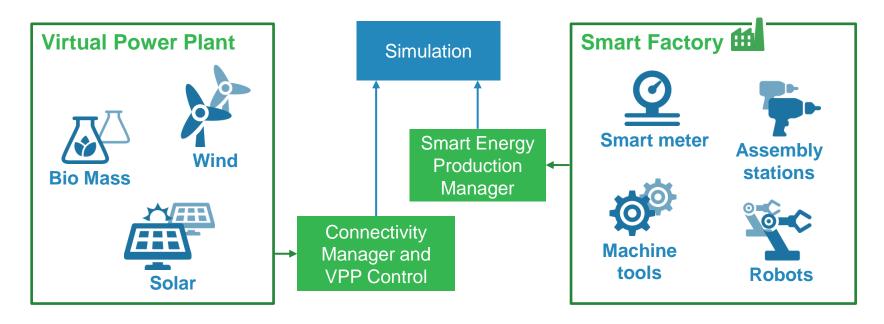

- Combine renewable energy production with Demand Site Management to a Virtual Utility
- Combine different volatile energy production to guarantied CO2 free certified energy
- Increase the part of renewable energy of the consumption of electrical energy

#### Trial setup

- Trial installation in Belgium and Germany
- ~10 renewable energy sources
- ~ 1 demand site

# Ideas for innovations and applications

- Aggregation of typical energy load and production profiles
- User-friendly GUI and dashboard for energy monitoring
- Decision support system for energy-aware production
- Energy efficiency planner for SME customer
- Whatever you have in mind...

### **Contraints**

#### Real-time

- End-2-End data management
- Security in critical infrastructure
- Production schedule aggregation
- Demand site response

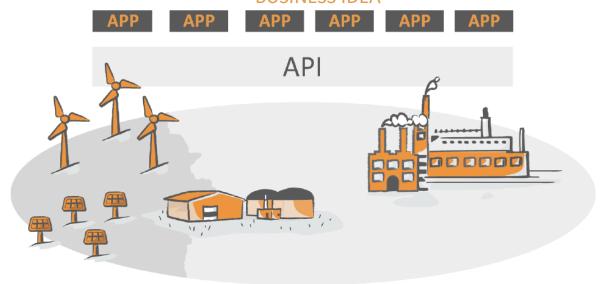

#### Demand site management

- Energy schedule planning
- Production process steering through energy production

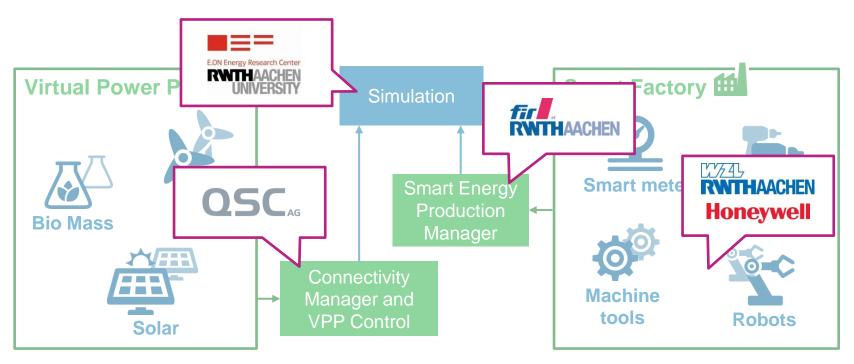

## Access to trial site over API

CONTROL SOFTWARE
HARDWARE
VISUALISATION BUSINESS IDEA SENSORIC

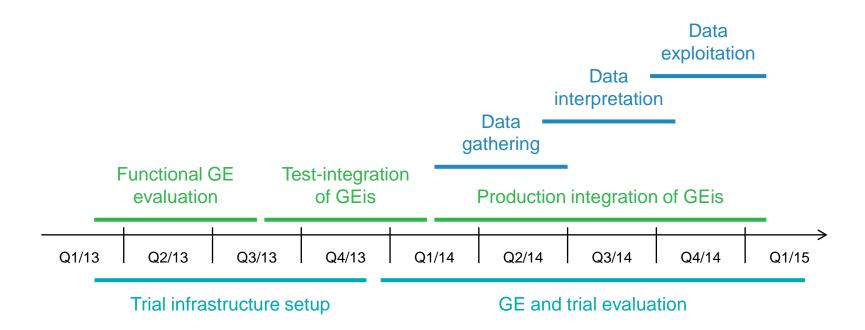

# Who will you work with?

# Timeline on integration

# **Good luck!**
